Mr. Matt Johnston  
Quality Manager  
MACOM Technology Solutions Inc.  
9 Hampshire Street  
Lawrence, MA 01840

Dear Mr. Johnston:

Re: Wafer Fabrication Facility Certification, MIL-PRF-19500P, Amend 3; FSC 5961,  
VQ(VQE-17-030834), MFG CAGE Code: 52GC4, Control Number 052704

Your wafer fabrication facility located at 100 Chelmsford Street, Lowell, MA, was audited by Messrs. Carl DelloStritto and Alan Barone of this Center, and Mr. Benny Damron from NASA on April 12-14, 2016 for compliance with the JANS Wafer fabrication requirements of MIL-PRF-19500P, Amendment 3.

Compliance with these requirements has been successfully demonstrated; therefore, MACOM Lowell is considered a certified wafer fabrication facility eligible to supply JAN- JANS signal diodes, rectifiers, zeners, schottky, current regulators and TVS wafers in accordance with the requirements of MIL-PRF-19500P, Amendment 3.

This certification will be valid for two years from the date of this letter and can only be terminated by written notification from this Center. For the duration of the certification, the manufacturer is subject to periodic reviews by the qualifying activity or its representatives. Certification will not normally be extended beyond the two-year period without a reaudit.

Note: The results of the DLA audit held on April 12-14, 2016 were found by examining a sample of the manufacturer's normal manufacturing, testing, and processing procedures. The acceptance of the corrective actions from the above referenced audit does not relieve the manufacturer of its contractual obligation to deliver product that complies with all specification requirements.

If you have any questions, please contact Mr. DelloStritto at 614-692-0616.

Sincerely,

for ALAN J. WILL  
Chief  
Sourcing and Qualifications Division
